

To the Commission:

I wish to submit comments opposing the adoption of 01-278 in its present form. Docket 01-278 includes a proposal from Savi Technology (RM-10051) which proposes to legitimize a product developed prior to the rulemaking. This is no different from a public policy standpoint than a criminal writing a fraudulent check and then asking the state legislature to make that particular transaction legal after the fact. For this reason, and that the Commission should not put corporate interests ahead of already well-established private ones, I object to adoption to 01-278 and RM-10051. I further respectfully request the two proceedings be severed and RM-10051 denied.

Respectfully,

/s./ James E. Whedbee  
James Edwin Whedbee, NOECN
